

AT YOUR SERVICE:

WATER & ENERGY SAVERS CONSULTING PRACTICE

SPECTRUM OF OUR SERVICE

Our service has evolved from traditional engineering consulting to include program and project management in response to the ever changing needs of our clients.

This service offering aims to make sustainable business practice made easy.

DEFINING THE PROBLEM AND QUANTIFYING THE SOLUTION

Water & Energy Savers knowledge of water and energy efficiency issues, technology and legislation allows our Consultants to work with clients to define and document their problem – and the opportunity.

To date solutions have been developed for over 2,500 organisations following analysis of their water and energy use using a combination of tailored approaches that include:

- Audit and site inspections
- Staff and visitor / patron interviews and observations
- Feasibility studies
- Field investigations
- Policy review
- Compliance and risk management

PROGRAM MANAGEMENT

Water & Energy Savers develop, manage and deliver environmental efficiency programs for and on behalf of large and complex organizations that have multiple sites, locations and clients.

Traditionally, programs have been delivered for government departments, agencies and utilities but this is changing as large corporate organisations realise the benefits of environmental efficiency.

Program briefs include:

- Water efficiency audits and appraisals
- Water efficiency upgrades and retrofits
- Water recycling and reuse systems
- Rainwater harvesting and storm water recycling systems
- Solar Panel Systems and solar hot water systems
- Environmental management plans

Examples include:

- Schools Water Efficiency Program
- Savewater Efficiency Service
- SA Water – Water Efficiency Service

PROJECT MANAGEMENT

Water & Energy Savers assists many of its clients realise their efficiency improvements quicker and more effectively by project managing the work for them.

In response to clients needs, Water & Energy Savers offers services including:

- Regulatory compliance and reporting requirements
- Procurement of materials and technology
- Trades management (including tenders, selections, training, site management and monitoring)
- Installation
- Works supervision
- Post works inspection and certification

Examples:

- Over 1,500 government water grant projects (value \$69 million)
- Over 80 hotels and resorts nationally and across Asia-Pacific
- Southern Health
- Monash University

MAINTAINING EFFICIENCY GAINS

From the thousands of clients we have serviced since 1992, we have observed that their ability to maintain efficiency gains is greatly impacted by the ability to monitor, analyse and interpret water and energy consumption.

In response, Water & Energy Savers provides programs and ongoing management of client sites:

- Procure, install and set up remote monitoring systems or sub-meters for utilities
- Monitor online data on your behalf. Find out more – www.metermate.com.au
- Measure efficiency gains by analysing consumption data before and after implementations
- Continue to review and update water and energy management plans
- Advise on new and alternative measures
- Provide training and support

FUNDING

Through our analysis and recommendations, Water & Energy Savers identify solid business cases, so that through funding and implementation, the benefits will be realised.

To improve the chances of projects or programs being implemented, Water & Energy Savers maintain a constant watch over grant programs nationally.

Water & Energy Savers also facilitate payment plans for qualifying commercial customers and organisations as part of a joint initiative with the Sustainable Melbourne Fund.

BENEFITS OF OUR SERVICE

By improving water and energy efficiency and management, Water & Energy Savers are able to assist businesses to:

- Reduce operating costs
- Improve quality
- Improve productivity
- Improve customer and staff amenity
- Improve bottom line and competitiveness
